### **Statement of Intent – Darryl Scott**

I would like to study, gaming design, to research and understand how to incorporate the gaming into education learning models, which will assist people to enhance their learn skills through virtual experience. I will also explore how gaming can be a framework to assist people with learning challenges. Understanding the links in learning, how to create a virtual gaming system, which aims to build people confidence in themselves and understand key learning frameworks.

I have chosen JCM Academy through researching the courses and the campus on many universities. Being base in Brisbane will assist me firstly to do my family duties. Also, the learning context of a smaller classes and the models of increase practical learnings in class will assist me greatly. I have viewed and believe the resources available will drive my learning outcomes. I also require time to allow new concepts and ideas to formalise knowledge through hands on experience. I do believe I will achieve this with JCM Academy.

Knowledge and practice in creating a gaming system. Understanding the technical frameworks in how to develop and implement a gaming system and how I can link the education outcome to practical virtual experiences.

Looking for a supportive environment. I am looking for teachers who share knowledge and can train in the technical side of gaming. I also want to be challenged and to push to grow in the industry. To be part of the gaming industry while explore its endless possibilities.

In the next year five, I will have developed a training organisation that uses gaming design as a key model of virtual practical framework of learning to remodel the online and face to face delivery of training. I will also be investing the AI potential to enhance the relationship with gaming, education and AI abilities.

I know what I am seeking from the course. I am driven by my vision and will seek knowledge in how to achieve my dream. I am at a mature age where wasting time is not practical. I am looking for growth. I do enjoy creating new ideas, systems or organisations to assist others in learning and to improve people's life outcomes.
